Subject: FW: Allied site - city proposed compromise - media inquiry

All,

I am back in the office. Can we respond to this reporter? I'd like to, so that we can support the city during this rollout.

1. We have taken part in the discussions with MDEQ and the city. They have been a true three party partnership.
2. We plan to add an additional option to the FS *after* we show a couple new configurations to citizens and get their input.
3. The dates for the Proposed Plan and the ROD will depend upon the timing of joint (EPA, MDEQ and city of Kalamazoo) community outreach over the coming months.

Michael

Thanks! I'm supposed to write about it today. So even a written statement would help if there's no time for an interview. Basically would want to know - if yes, EPA is taking part in discussions about a different option for the Allied site. How would adding a new option into consideration work in the EPA's superfund process? I heard last the ROD on this OU would likely be out in Fall 2015. Is that correct? Would this proposal delay that process at all? Best~

Hi Francisco,

I'm writing about the city of Kalamazoo backing away from total removal for the Allied site. It put out a press release that's it is proposing a compromise. Is there any chance that the EPA would redo its feasibility study to include such an option? If you could, please let me know either way.

Thanks!

All the best,

--
